ROADSHOWS & WEBINARS

2025 Events and Webinars

WEBINAR DETAILS

Living in a Myopic World

Suitable for: Everyone. CPD point Optometrist, DO, CLO

As myopia management becomes the standard of care, this webinar reviews the latest research and how it is being adopted in everyday practice, not just in the UK but around the world. The myopia control optical corrections will be reviewed along with instrumentation that can be useful in myopia management.

The webinar will also include a short Nocturnal MC+ presentation, highlighting how customised night lens design can affect corneal treatment zones in relation to myopia.

The Ups and Downs of Corneal Topography

Level: Aimed at new and existing topographer users. Suitable for all levels of experience. CPD point Optometrist, DO, CLO

This lecture covers how topography can enhance your practice by assessing tear film, contact lens fitting and disease detection. Aimed to make sure you get the best use of your topographer on a daily basis and also what to know if you are considering buying a topographer.

The webinar will also include a short presentation aimed at what to look for when buying a topographer, and the revenue streams they can open in practice.

Orthok Night Lens Fitting Theory – All the Gear and No Idea?

Level: Aimed at those new to night lens fitting. Suitable for all levels of experience. CPD point Optometrist, DO, CLO

This presentation covers orthok night lens fitting. We will be looking at the patient journey, lens designs, the corneal response and conclude with why and how refraction is corrected. Giving you an understanding that will enhance your communication in practice.

The webinar will also include a short presentation aimed at how you can get started fitting ,or switch to Scotlens for all your existing night lens patients.

Night Lenses in Practice-Stories from the Consulting Room

Level: Aimed at new and existing night lens fitters. Suitable for all levels of experience. CPD point Optometrist, DO, CLO

This webinar looks at patient examples that highlight why orthok night lenses are the preferred mode of wear. High myopia, myopia control, post-laser fitting and soft lens dry eye intolerance cases will be shown. Giving good insight for current orthokeratologists or those just interested in more unusual cases.

The webinar will also include a short presentation about how to claim your share of the available business by securing your space on nightlenses.com

NOCTURNAL NIGHTLENSES ROADSHOW DETAILS

Night Lenses | The new name for Orthok

Everything you need to know about night lenses, presented in a friendly relaxed group setting, with some weird and wonderful case examples! We will show you each part of the fitting process, sharing knowledge gained over many years of successful practice.

Combined with short cuts to marketing the lenses in the most effective way, this will complete the picture, and you will leave ready to put your new knowledge into practice right away.

What people are saying about these events:

'I loved the session and will attend another one in the future if it comes back again'

'I found the morning super interesting, a good amount of basic stuff, but not too much to not get bored'

'I found the whole day really informative and appreciate the time you take to explain everything'

AGENDA
